Shareable Showers

The morning rush is a thing of the past with a shower built for two. You'll never have to wait your turn again.

for more ideas

To see a slideshow of showers for two, check out KitchenBathIdeas.com/kbi45

1. RIGHT HEIGHT

Showerheads installed at differing heights allow you to customize the shower for each of you. And separate controls bring an end to temperature disputes. Seats offer space for you both to sit down.

2. WITHOUT WALLS

A wet room is a great alternative for a small space. Eliminate the tub or shower stall and turn the whole room into a tiled shower. Multiple body sprays enhance the spa-like experience.

3. ASIAN-INSPIRED

The Japanese used public bathhouses for hundreds of years out of necessity. This dual shower pays homage to those traditional roots with a shoji screen-inspired door. Enjoy the tranquility of a Zenlike shower.

4. TIMELESS STYLE

Get double the pleasure out of your traditional bathroom by multiplying the fixtures by two. An additional rain-style showerhead makes showering even more luxurious.
